Indulge yourself in the perfect view!

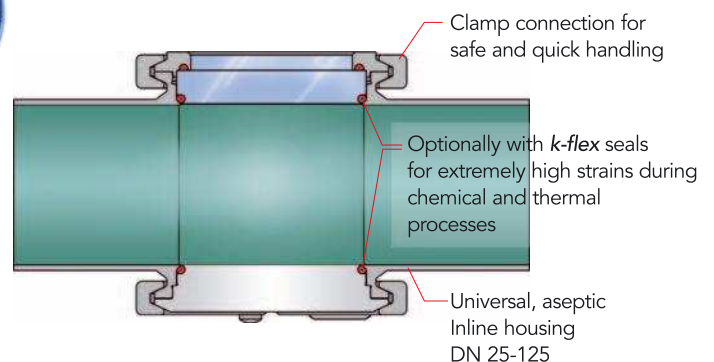

BestControl Inline housing for measuring and control systems

With the new Kieselmann *BestControl* Inline housings and the respective measuring and control systems, you will always have a complete overview over your medium. The optimised housing form offers universal connection possibilities and can be cleaned safely by means of the CIP/SIP method. In combination with the Kieselmann *k-flex* sealing elements, the service intervals can also be extended considerably.

Technical data

Material	1.4404/316 e-polished DIN 11850 series 2
Pipe connection sizes	DN 25, DN 40, DN 50, DN 65, DN 80, DN 100, DN 125
	Welding connection standard Further pipe connections optional
	2 apparatus connections with clamp connection
Sealings	EPDM (FDA) <i>k-flex</i> (FDA) sterilisation 140°C
Surface in product contact	$Ra \leq 0,8 \mu m$

Universally connectable - for all kinds of application

The Kieselmann *BestControl* Inline system is extremely intermateable with all kinds of application. It is fully compatible with most of the common systems and accessory components. Kieselmann offers the following components for connection:

NEW!

- ▶ Sight glass / blind flange
- ▶ LED sight glass illumination
 - With clean flange connection, energy-saving technology and illuminant service life of approx. 20000 hours.
- ▶ Measuring sensor
- ▶ Inline sampling valve
 - with manual and pneumatic operation
 - Seal exchange without dismounting the actuator

Further measuring and control components on request.

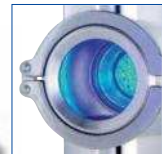

BestControl Inline housing with sight glass and blind flange respectively.
